The builders from Belarus are the winners of the month. CONGRATULATIONS!

MAIN ACTIVITIES

The scope of works planned for June for the whole “Litana” Group amounts to 101526 hours. During this month it is planned to produce 346 tons of metal structures for objects being under construction in Russia, Belarus, Lithuania, France, Finland, Sweden, and 2 315 tons of metal structures for shipbuilding industry.

In Russia the construction of the trade center in Khabarovsk will be continued.

In Byelorussia the construction of the trade center of construction materials in Gomel and the automobile center in Soligorsk will go on. The construction of the trade center in Grodno will start.

In Sweden the installation works in the scientific center in Lund city will be continued, as well as the construction of the hospital in Stockholm. The design of the university building in Kalmar city is started. The commercial building in Linkoping is planned to be handed over to the customer.

In Ukraine the installation of specific doors in Chernobyl NPP will be continued.

In Finland the ship hull assembling works will be carried on in Turku, as well as installation of doors and hatchways on the nuclear power plant in Olkiluoto.

In France the ship hull construction and assembling works, piping and painting works are to be carried out at the shipbuilding yards.

THE CONSTRUCTION OF THE TRADE CENTER “OMA” IN GOMEL CITY

Today the assembly of structural framing is completed, the mounting of cladding structures of the roof and walls is carried out, the preparation of floor filling works is going on. Andrey Pozdniakov is managing the project.
In April this year, Deputy to Technical Director Kristina Levickienė was appointed Head of Design Department at „Litana” Group. Kristina works in our company already more than seven years, during them she took part in designing and managing of many projects, among them the most difficult. According to Kristina, intensive work, persistence and achievement orientation, as well as the personal and career growth plan, made by her during her study in Kaunas technological university, help her to achieve her goals.

We congratulate Kristina with this appointment and we want her to ask several questions:

What is by your opinion the most important thing for your work?

Work in “Litana” every day brings new questions, interesting projects, challenges, which require unusual decisions. For me it is important that here there is a real chance to realize myself, I can fully use my professional, intellectual, creative and emotional potential. As for the work, I most appreciate the possibility to grow, study and improve myself. For me the possibility to communicate and exchange knowledge with my colleagues is necessary. Definitely, it has been well said that you have to study all your life to become designer, because in our times of continuous progress. Besides, we plan to develop our design services actively beyond Lithuania as well, where we see the great potential for ourselves.

How these ambitious plans influence your team?

No doubt that our strive to be leaders and continuous progress of our competitors makes us develop within our department and invite new specialists. This year we plan the intensive integration of structural designers, working in Kaliningrad, in design works for Scandinavia and the Baltic countries.

Tell us about BIM process without which it is hard to be competitive both in Scandinavia and in Lithuania.

This is a very important process, which joins together in a single organizational scheme the design, production, construction and commercial departments. Thus, within the company we have a task for further development and making BIM, in which all divisions and operation departments take part.

Thank you, Kristina, for the interview, I wish that the most ambitious your objectives would successfully come true.

Our main task is to become one of the biggest companies fulfilling general design in Lithuania. To create a well running mechanism of inner interaction and choose the reliable subcontractors to design of allied parts of projects. Besides, we plan to develop our design services actively beyond Lithuania as well, where we see the great potential for ourselves.

NEW FACILITY IN BELARUS

On the 6th of May, 2016, „Litana-BelStroy” company signed a construction contract for the building of the construction materials’ trade center «Материк» (“Continent”) in Grodno, with the area of 12,700 m². The construction began on 18.05.2016, and its ending is scheduled for 02.02.2017. The retail space commissioning is planned for 01.11.2016. Pavel Orlov, construction site manager, is entrusted to manage the project.

The peculiarity of a building is a complex, volumetric facade. The construction materials’ trade center «Материк» (“Continent”) will be located at Grodno city entrance point from Minsk route and will be the city’s face.

In May a Commercial Director of “Litana Norge AS” Konstantin Romaikin completed his study and received a certificate confirming that he completed the courses for reinforced concrete structures installation, according to Norwegian building standards.

Such a certificate will not only comply with the rules imposed on construction sites but also be more successful in negotiations with potential clients.

The current economic situation in Russia provides excellent opportunities for export development. In this regard „Litana” Group plans to increase significantly the production of steel structures at the „Kaliningrad Shipyard”, which it owns, for its facilities in the Nordic countries and the Baltic states. Today its modernization is already completed and additional personnel recruitment is still going on, EN 1090 and LST EN ISO 3834 certificates are obtained. And our largest European customers make regularly audits of our product quality.

Thus, in April, „Kaliningrad Shipyard” has successfully underwent the audit, which was initiated by the largest Scandinavian company - NCC. The representative of NCC, Purchasing Manager Bartolomiej Sudzik appreciated quality of products and confirmed its compliance with the Scandinavian market standards.
SPONSORSHIP HELP IN FRANCE

In March the employees of SARL "Litana-France" visited the children’s unit of the hospital in Saint-Nazaire and provided sponsorship support for acquiring 830 soft toys for the operating unit.

Why toys?!
It was the initiative of nurses of Saint-Nazaire medical center, who understand what kind of stress their young patients suffer before they are operated: every child must have a toy, hoping thus to help children cope with these hardships.

The "Litana" group’s team was sincerely happy to help making this high idea come true!

COMBATIVE MOOD OF OLYMPICS

On 13th of May, 2016, four teams of “Litana” Group of Companies gathered together for competitions in table tennis and shooting. In table tennis success and good fortune accompanied a team of EU, Belarus team won the shooting.

The letter of thanks from the association:
"The Hospital center of the Saint-Nazaire together with the "Le Petit Dudu" association are very touched by your help. We are sincerely thankful to you for your contribution to the improvement of the conditions for children waiting to have surgery. The toys that we purchased owing to you will give to our young patients, and they will give them comfort and support during these difficult moments!"

The President of the Association Sophie
"Many thanks to "Litana", working at the shipyard in Saint-Nazaire, for you financial support in buying toys! Thank you for your generosity and kindness, it’s so nice that we are able to give them to our little patients!"

A sea-calf... suddenly came ashore and settled on the piers of the Kaliningrad shipyard, belonging to “Litana” Group in Kaliningrad! What made him come so far away from the sea, to the watertight corner, probably it knows, but it feels comfortably and easily.

The ancient Greeks associated a sea-calf with the transformation: virgin nymphs, belonging to the sea-god escort, turned into sea-calfs, to avoid men’s harassment.

Who knows... Maybe this has some sense, because the Kaliningrad shipyard team consists mostly of male staff.

The employee of the Moscow office, contract manager Elvira Gorbunova married Philippe Basaure Soto on the 26th of March.

Tomas Vainorius, Head of Ship-building Commercial Department, ran 10 kilometers.

The employee of the Moscow office, contract manager Elvira Gorbunova married Philippe Basaure Soto on the 26th of March.

HR Manager Laura Sauliūnė came with two her daughters: the eldest Deimante hit honorable 10 km distance, following her example the younger sister ran short, but no less important distance of 600 meters.

Project Manager Arnas Januska covered half-marathon distance of 21.1 km.

Project manager Andrius Kiaulakis and his fiancee Eimante exchanged wedding rings on the 13th of April.

Colleagues are wishing happy family life to newlyweds!

Litana-Lithuania

Anniversaries celebrated in June:

55 years... Vladimir Shalaginov, foreman
45 years... Fiodor Pidhurskiy, ship metal hull assembler; Oleksandr Dubovskyy, welder
40 years... Antanas Stasiukėnas, welder; Vadim Ivashov, chief engineer
30 years... Dragos Michalace, pipefitter; Kristina Kushechevaya, office manager
25 years... Yekaterina Shadrina, financial department manager
20 years... Karolis Mizaras, metal structures assembler

As of 18th of April, Jūratė Sakutienė started working as project evaluation department’s engineer.

As of 3rd of May, Diana Kasnauskytė started working as an accountant.

As of 26th of April, Roman Kudriščov started working as assistant to projects manager.

CAREER

CONGRATULATIONS

CAREER

UNEXPECTED GUEST

This year, 4,000 registered runners donated 13,585 euros; at the end of April the participants of the “Dance of Hope”, as well as participants of the “Marathon of Hope in canoes” - respectively 2,000 and 4,000 euros.

The idea to organize the “Hopes” events was generated in 2008, when the monastic order of the Franciscan brothers decided to launch the project of the information and support center for those who ill with cancer in Klaipeda. The idea how to raise money for its construction was very unusual! Every year the Franciscan brothers organize in Lithuania a variety of activities under common name “Hope”: distance race marathons, biking races, kayaking, gymnastic competitions, dance competitions, the tickets for which are donations for construction center and for patients support.

Today, nine years after the first start of “Hope Race”, the St. Francis Cancer Center in Klaipeda is already opened. And “Hope” continues to live and overgrows with more and more new participants, thus providing support for cancer patients and promoting a healthy lifestyle.

This year “Litana” employees together with their family members decided to join this noble event and participated in the “Race of Hope”. Deputy to General Director on HR D. Zarumskienë assured that next year “Litana” staff will share “Hope” not only in races, but also in other “Hope” events. After all, among our employees there are professionals and amateurs of bicycles and motorcycles, swimmers and dancers, and many other talents.

HUGGING HOPE TOGETHER!

As of 18th of April, Jūratė Sakutienė started working as project evaluation department’s engineer.

As of 3rd of May, Diana Kasnauskytė started working as an accountant.
